We believe that lifting up women benefits everyone.

That is why, for more than 25 years, we have been helping aspiring women entrepreneurs and business owners to launch and grow their business by meeting them where they are and providing **greater access to the resources, tools, and support** they need to achieve business success. Because when we empower women to succeed economically, **they are better positioned to support themselves, their families and the communities around them**.

CWE welcomes anyone who identifies as a woman regardless of assignment at birth.
