The NBC Boston article discusses efforts to combat asset poverty, which affects many low-income individuals and families lacking savings or financial security. It highlights initiatives aimed at improving financial literacy, access to resources, and support systems that can help people build wealth and stability. The article features community programs and organizations working to provide education and tools for better financial management, emphasizing the importance of addressing asset poverty to create more equitable economic futures. Overall, it advocates for targeted solutions to empower those in financial need.
