Parent Professional Advocacy League

Family and Parenting Support · https://community.womensmoneymatters.org/resources/parent-professional-advocacy-league/

The PPAL Central MA office offers free support to families when children have emotional, behavioral or mental health needs. PPAL is staffed by family support professionals who have lived experience raising children with behavioral needs. We can offer support, suggest new strategies to move forward when families are stuck trying to access services through school or insurance, and connect you with other parents and family members.
